# INNOVATIVE SPATIAL CONCEPTS IN HARMONY WITH FUNCTION

# IDEA PROGRAMME

Opaque glass acrylic surfaces create a soft lighting effect and lend visual depth and tranquillity to the room. Their velvety matt character gives surfaces an elegant restraint that appears both modern and timeless.

IDEA is a new programme that impresses with its wide range of plain colours in a high-quality, deep matt finish and creates striking accents depending on the incidence of light.

# PLAY OF COLOURS IN ACRYLIC

IDEA combines the aesthetics of glass – transparency, brilliance and opacity – with the advantages of high-quality glass acrylic. The material is **unbreakable, scratch-resistant, shockproof** and **UV-resistant**. A material with many strengths.

The matt, clear acrylic glass surface gets its uniform colour from a layer of coloured lacquer underneath the glass acrylic. The surrounding bevelled facet edge appears to be embedded in the material and enhances the depth effect of the surface through light refraction.

In keeping with the slogan “colour doesn't have to be loud”, the opaque shades impress with their matt elegance and create a calm, gentle atmosphere.

## IDEA comes in four fresh, modern shades:

- **PM 170 sandy white** – a calm, warm, rich white tone
- **PM 171 almond grey** – a balanced grey-beige
- **PM 172 sage green** – a fresh, subtle light green with a natural touch
- **PM 173 crimson** – an elegant, deep red tone with a powerful presence

## IDEA as a front:

Front with 1.2 mm acrylic and colour-matched back panel

## IDEA as accessory surround in 16 mm version:

1.2 mm acrylic coating on both sides

A colour-coordinated FS lacquer is available as a fully integrated accessory surround solution.

# METURO PROGRAMME

## — ACRYLIC IN A METALLIC LOOK

With its silky matt acrylic surface and velvety feel, METURO is not only easy to clean thanks to cutting-edge nanotechnology, but also stylish in every respect. The opaque surfaces create a calm, homogeneous effect – ideal for minimalist designs in which colour and form create a clear unity. Thanks to innovative, ion-based surface technology, METURO is antibacterial and thus perfectly suited for use in the kitchen.

### METURO comes in three metallic shades:

- **VM 075v satin platinum** – a cool shade of grey with a silvery undertone, elegant and understated
- **VM 076v satin copper** – a warm shade with a metallic sheen that adds elegant and lively touches
- **VM 077v satin graphite** – stands for urban clarity and depth, an expressive colour with a modern presence

METURO is available as a front material and 16 mm thick VM surround material.

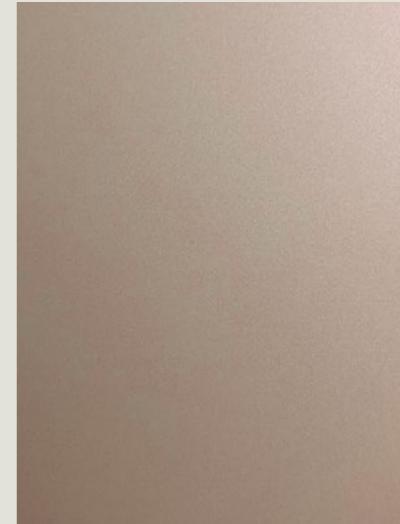

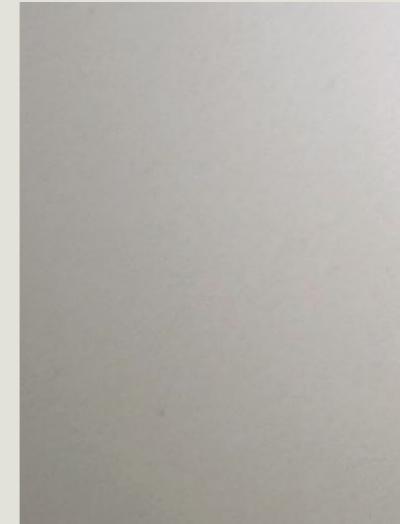

A colour-coordinated ME metallic lacquer is available as a fully integrated accessory surround solution.

# WAKUU PROGRAMME – CLEARLY SHAPED

The WAKUU programme gives kitchen planning a special spatial effect thanks to its distinctive yet delicate frame front.

## COLOURS

WAKUU and WAKUU FS frame programme – delicate design with a narrow frame measuring just 10 mm – a modern interpretation in elegant wood or high-quality lacquer. The frame front, available exclusively in PRIMO, is compelling with its precision craftsmanship and wide range of possible combinations: available in 11 wood tones, 18 LEICHT standard colours, RAL shades and the Les Couleurs® Le Corbusier® colour collection. In addition, our six coordinated Hygge RAL colours open up a wide range of combinations for individual room solutions. Ideal for demanding designs with a unique character.

Designer handle 590 – form-fitting and distinctive. Specially developed for the WAKUU and WAKUU-FS programmes, the 590 designer handle blends perfectly into the frame's design language. The handle price is included in the programme. With a width of 20 cm and a height of just 1 cm, it strikes a perfect balance between understated elegance and striking design accents. A wide range of additional handles from the existing and new collections are of course also available for WAKUU and WAKUU-FS.

**SPECIAL FEATURE:**

- With matching graining
- Width and height can be adjusted
- Accessory surround: colour selection analogous to programme accessory surround TOPOS (excluding colour H 223h)
- Wooden frame mitred
- Back panel smooth veneer and visible frame
- Available in a wide range of standard grid widths

Handle colours:  
416 bronze dark  
417 steel black

Design line: PRIMO  
Programme: WAKUU  
Front thickness: 2,2 cm  
Programme number: 280  
Price group: 6

Accessory surround: H

# WAKUU-FS PROGRAMME

The lacquer variant WAKUU-FS is compelling with an impressive variety of colours: in addition to the tried-and-tested LEICHT standard colours, colours from the RAL colour system and from the exclusive Les Couleurs® Le Corbusier® colour collection are also available.

With WAKUU-FS, the six RAL colours of our Hygge colour concept invite you to enjoy even more design freedom.

**Colours:**  
18 LEICHT standard colours  
+ RAL/NCS – including Hygge colour concept  
+ Les Couleurs® Le Corbusier® colour collection

Design line: PRIMO  
Programme: WAKUU-FS  
Programme number: 281  
Front thickness: 2.2 cm  
Price group: 4

Accessory surround: FS

# AMETIS PROGRAMME

## – METALLIC LACQUER FOR SPATIAL EFFECT

With AMETIS, we are setting a milestone in lacquer expertise. The exclusively newly developed metallic lacquer programme combines state-of-the-art lacquer technology with exclusive design standards and expands our range with four elegant metallic colours. AMETIS is compelling with its uniform, matt metallic surface without any structural direction.

The subtle silk matt effect combined with metallic sheen gives the surface a particularly high-grade, refined character. A fully compatible ME accessory surround is available for AMETIS.

Design range:  
PRIMO, CONTINO, AVANCE  
Programme: AMETIS  
Programme number: 231 | 431 | 731  
Price group: 4

Accessory surround: ME

### Available metallic shades:

- ME 163 cuprum
- ME 164 auren
- ME 165 feron
- ME 166 tanor

With AMETIS, we create space for creative colour combinations and exclusive planning options – a truly distinctive programme for discerning customers who want to harmonise material aesthetics and elegance.

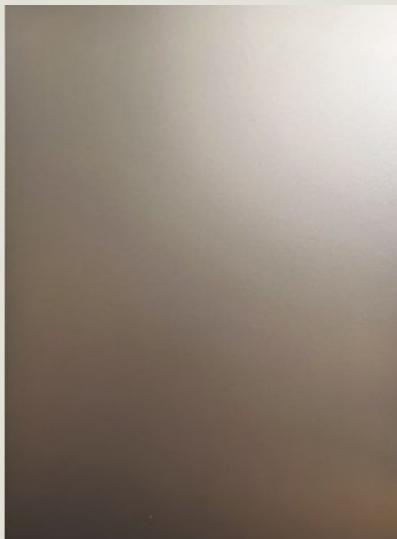

ME 163 cuprum

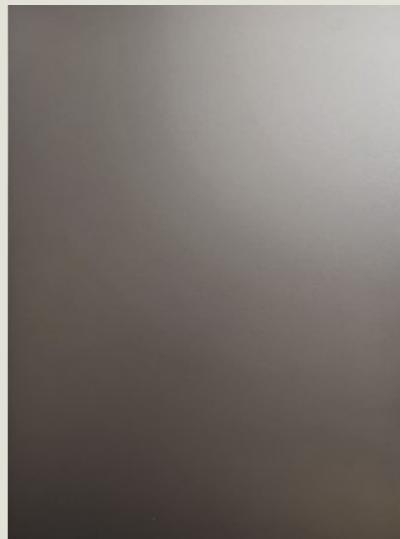

ME 164 auren

ME 165 feron

ME 166 tanor

# BOSSA-FS PROGRAMME

## COLOURS

With BOSSA-FS, we are introducing a new variant that gives the characteristic BOSSA look a more understated, refined appearance – and thus offers even more design freedom. BOSSA-FS adopts the clear, vertically structured design language of the original, complemented by a veneer that is perfectly suited to an open-pored finish. The surfaces are available in all LEICHT standard colours, in the RAL colour spectrum, the Hygge colour concept and in the exclusive Les Couleurs® Le Corbusier® colour collection.

**Colours:**  
18 LEICHT standard colours  
+ RAL/NCS – including Hygge colour concept  
+ Les Couleurs® Le Corbusier® colour collection

A world for living with emotion.

Immerse yourself in a Scandinavian world full of atmosphere. A living environment accompanied by warm colours, natural materials and a clear design language.

A place of absolute peace and tranquillity. The Hygge colour concept invites you to relax, feel at home and savour the moment.

RAL 090 90 30 wax yellow

## HYGGE COLOUR CONCEPT – FOR SELECTED LACQUER PROGRAMMES

RAL 250 80 10 light cyan

### A KITCHEN TO MAKE YOU FEEL AT HOME

The Hygge colour concept brings warmth, tranquillity and naturalness to everyday life. Inspired by the Scandinavian way of life, we present our six select RAL colours and showcase the beauty of simplicity through minimalist kitchen designs – light colours, soft textures, natural materials and an atmosphere that invites you to pause and reflect.

For maximum design variety, we are introducing the new Hygge colour concept for all lacquer ranges. These include embossed veneer, smooth fronts in textured lacquer and silk matt, as well as frame fronts.

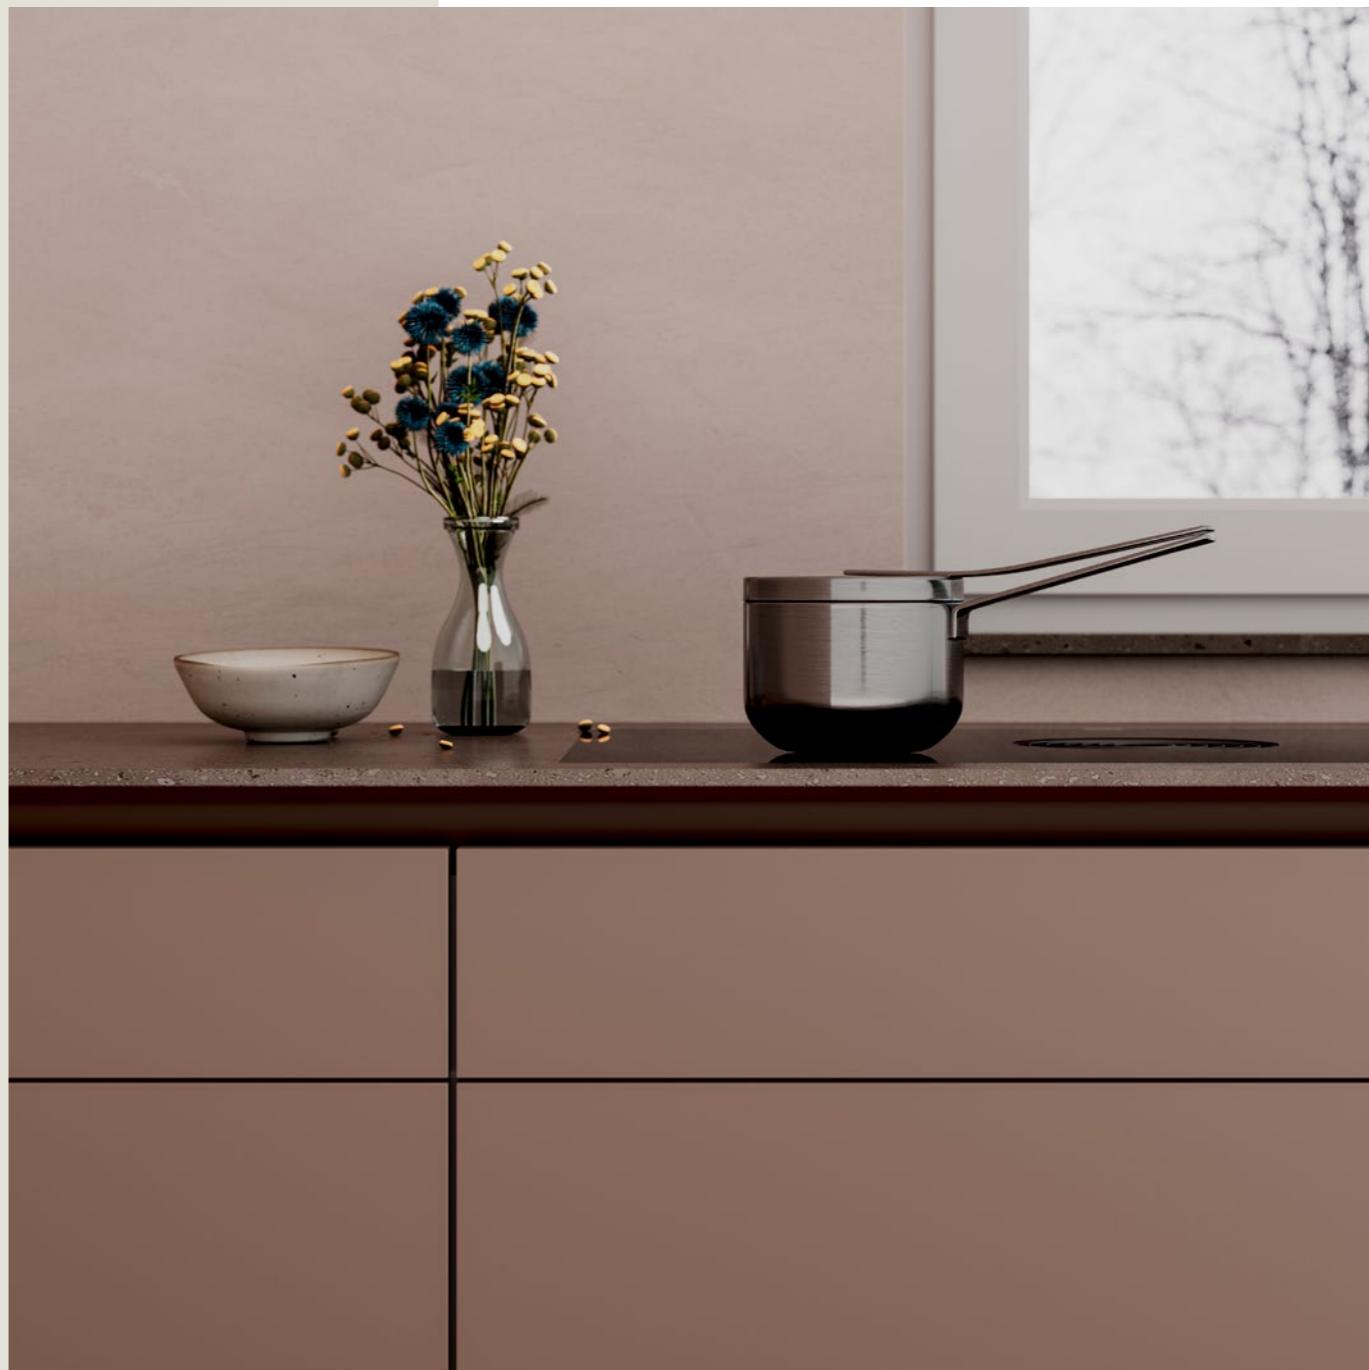

### Hygge colours: an overview:

RAL 120 70 10 nile green  
RAL 250 80 10 light cyan  
RAL 090 90 30 wax yellow  
RAL 010 80 10 mud pink  
RAL 060 60 10 oak brown  
RAL 070 80 10 flax beige

Suitable for all our programmes and worktops available in RAL colours.

### Programmes to be recommend:

# CURVED SIDE PANEL CONCEPT

With new curved side panels for furniture fronts, we are extending our design variety for kitchen and living space planning.

The curved side panels ensure gentle transitions and emphasise the flowing character of modern living and kitchen spaces – a response to the growing demand for organic, inviting interiors.

# ALL-ROUND STYLISH PLANNING

WFI 5R (R = 5 cm)

WFI 15R (R = 15 cm)

Design lines: PRIMO, CONTINO\*, AVANCE\*

Programmes: CLASSIC-FF, CLASSIC-FS,  
TOPOS, TERMA, BOSSA\*\*, BOSSA-FS\*\*

Panel thickness: 5 cm, 15 cm

Radius: R = 5 cm or R = 15 cm  
available curved on one or both sides

Heights: 13 cm - 230 cm

Minimum depth:

With side panels  
with a thickness of 5 cm: R-5 one side = 15 cm  
R-5 both sides = 20 cm

With side panels  
with a thickness of 15 cm: R-15 one side = 25 cm  
R-15 both sides = 40 cm

Maximum depth: At a height < 96 cm = 120 cm  
At a height ≥ 96 cm = 80 cm

\*\*Due to the lined embossing in the BOSSA programme, double-sided curved side panels are only available in permissible grid widths.  
Side panels curved on one side with dimensions outside the grid are not manufactured in the grid at the ends of the side panels.  
Lacquer fronts and wood fronts with smooth veneer can be changed in mm increments.

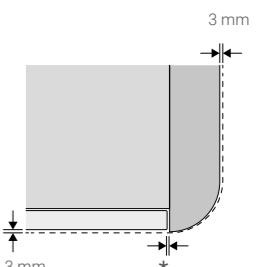

\*Recessed handle: Not possible with curved side panels

Furthermore, curved side panels can be designed either as freely suspended at carcass height or extending to the floor. A standard plinth is used for freely suspended side panels, while in the case of designs extending to the floor, the plinth is designed to abut against the curved side panel. The back panel and sides of the curved side panels are closed across the entire surface and are visually matched with the front in the visible area.

In addition to worktops, curved finishing tops and table tops also contribute to the sculptural effect of the furniture. The corner radius has to be considered carefully to ensure a visually uniform overhang of worktops, finishing tops and table tops over the front and curved side panels.

For radius processing on worktops, finishing tops and table tops, we recommend a radius equal to the side panel thickness plus the front overhang. For a uniform appearance, the side overhang and the overhang of the worktop at the front should be planned to be identical.

## PLANNING SUGGESTION:

Worktop radius:  
5.3 cm / 15.3 cm

\* The vertical joint  
between the side panel  
and the adjacent front  
panel is 2.5 mm.

# KYOTO PLANNING CONCEPT – ADDITIONAL COLOURS AND HANDLES

KYOTO – tradition reinterpreted: now with a metal handle and new design options.

The KYOTO planning concept, inspired by Japanese craftsmanship, stands for the harmonious combination of traditional values and modern aesthetics. Until now characterised by elegant wood handles in 319 alpine natural oak and 320 walnut natural, KYOTO will open up new design possibilities from the 2026 collection onwards:

The distinctive KYOTO handle 662 is now also available in a high-quality stainless steel finish – on request in 20 standard colours and in the Les Couleurs® Le Corbusier® colour collection. This allows the handle to be perfectly matched to plain surfaces, intermediate side panels and shelves – for an entirely harmonious, minimalist design.

Also new: the KYOTO programme approvals for plain colours have been extended! Can now also be planned with the programmes:

216 IDEA  
231 AMETIS  
238 METURO

Discover the next level of minimalist interior design with KYOTO – inspired by Japanese craftsmanship and realised with state-of-the-art precision.

## NOTE:

The KYOTO programme is coming to an end with the 2026 collection and will become the KYOTO planning concept. It can be used on almost every programme in our range.

Adjustments to the special features of KYOTO, such as shortened fronts to the bottom shelf, are made using the handle numbers.

# PULLOUT UTILITY UNIT

Pullout utility unit with set 1  
HAA 30 204 ZR  
HAA SET1

Pullout utility unit with set 2  
HAA 20 204 ZR  
HAA SET2

Pullout utility unit with set 3  
HAA 15 204 ZR  
HAA SET3

With the new pullout utility units, we offer a clever solution for making optimal use of narrow spaces – such as those that can arise today at the end of a tall unit run. The tall units are available in **widths of 15, 20 and 30 cm and heights from 190 to 224 cm**. Space, which is currently concealed

by a blender, can be used to create valuable storage space in a minimal area thanks to the clever “unit-in-unit” principle, ensuring maximum functionality – especially with the selection of equipment sets, which offer a wide range of possible uses.

## PRODUCT INFORMATION:

- Can be integrated into the PRIMO and CONTINO design lines (vertical recessed handle only)
- For unit depths 58 and 68 cm
- Interior style: 273 platinum and 284 carbon grey
- Right-hand version: accessible from the left-hand side
- Left-hand version: accessible from the right-hand side
- Handle-less design for a continuous front appearance
- Maximum payload 70 kg
- Inner pullout with 1.6 cm thick back panel
- Basic pullout unit: empty
- Adjustable in width

## EXCLUSIONS:

- IOS, IOS M
- BOSSA, BOSSA-FS (applies to widths 15 and 20 cm in the PRIMO design line)
- Frame programmes
- Q Programmes
- Inset handles
- Form griprails
- Profile griprails

## EQUIPMENT SETS TO CHOOSE FROM:

### Set 1: Shelf set

- 6 adjustable shelves in carcase colour
- Incl. aluminium railing in carcase colour
- Possible **from a unit width of 20 cm**

### Set 2: Organisation system set

- 2 rails for organisation system
- 1 tray
- 1 tray with railing
- 1 hook bar with 5 hooks
- 1 paper roll holder
- 1 two-step ladder with hanging device
- Possible **from a unit width of 20 cm**

### Set 3: Utility set

- 1 hook bar with 6 hooks
- 1 broom holder
- 1 dustpan and broom holder
- 1 two-step ladder with hanging device
- Possible **from a unit width of 15 cm**

## NOTE:

- Components of the equipment sets are also available individually for customising our units.
- Also available as a customisable empty pullout unit – creates narrow space for ironing boards or similar items.

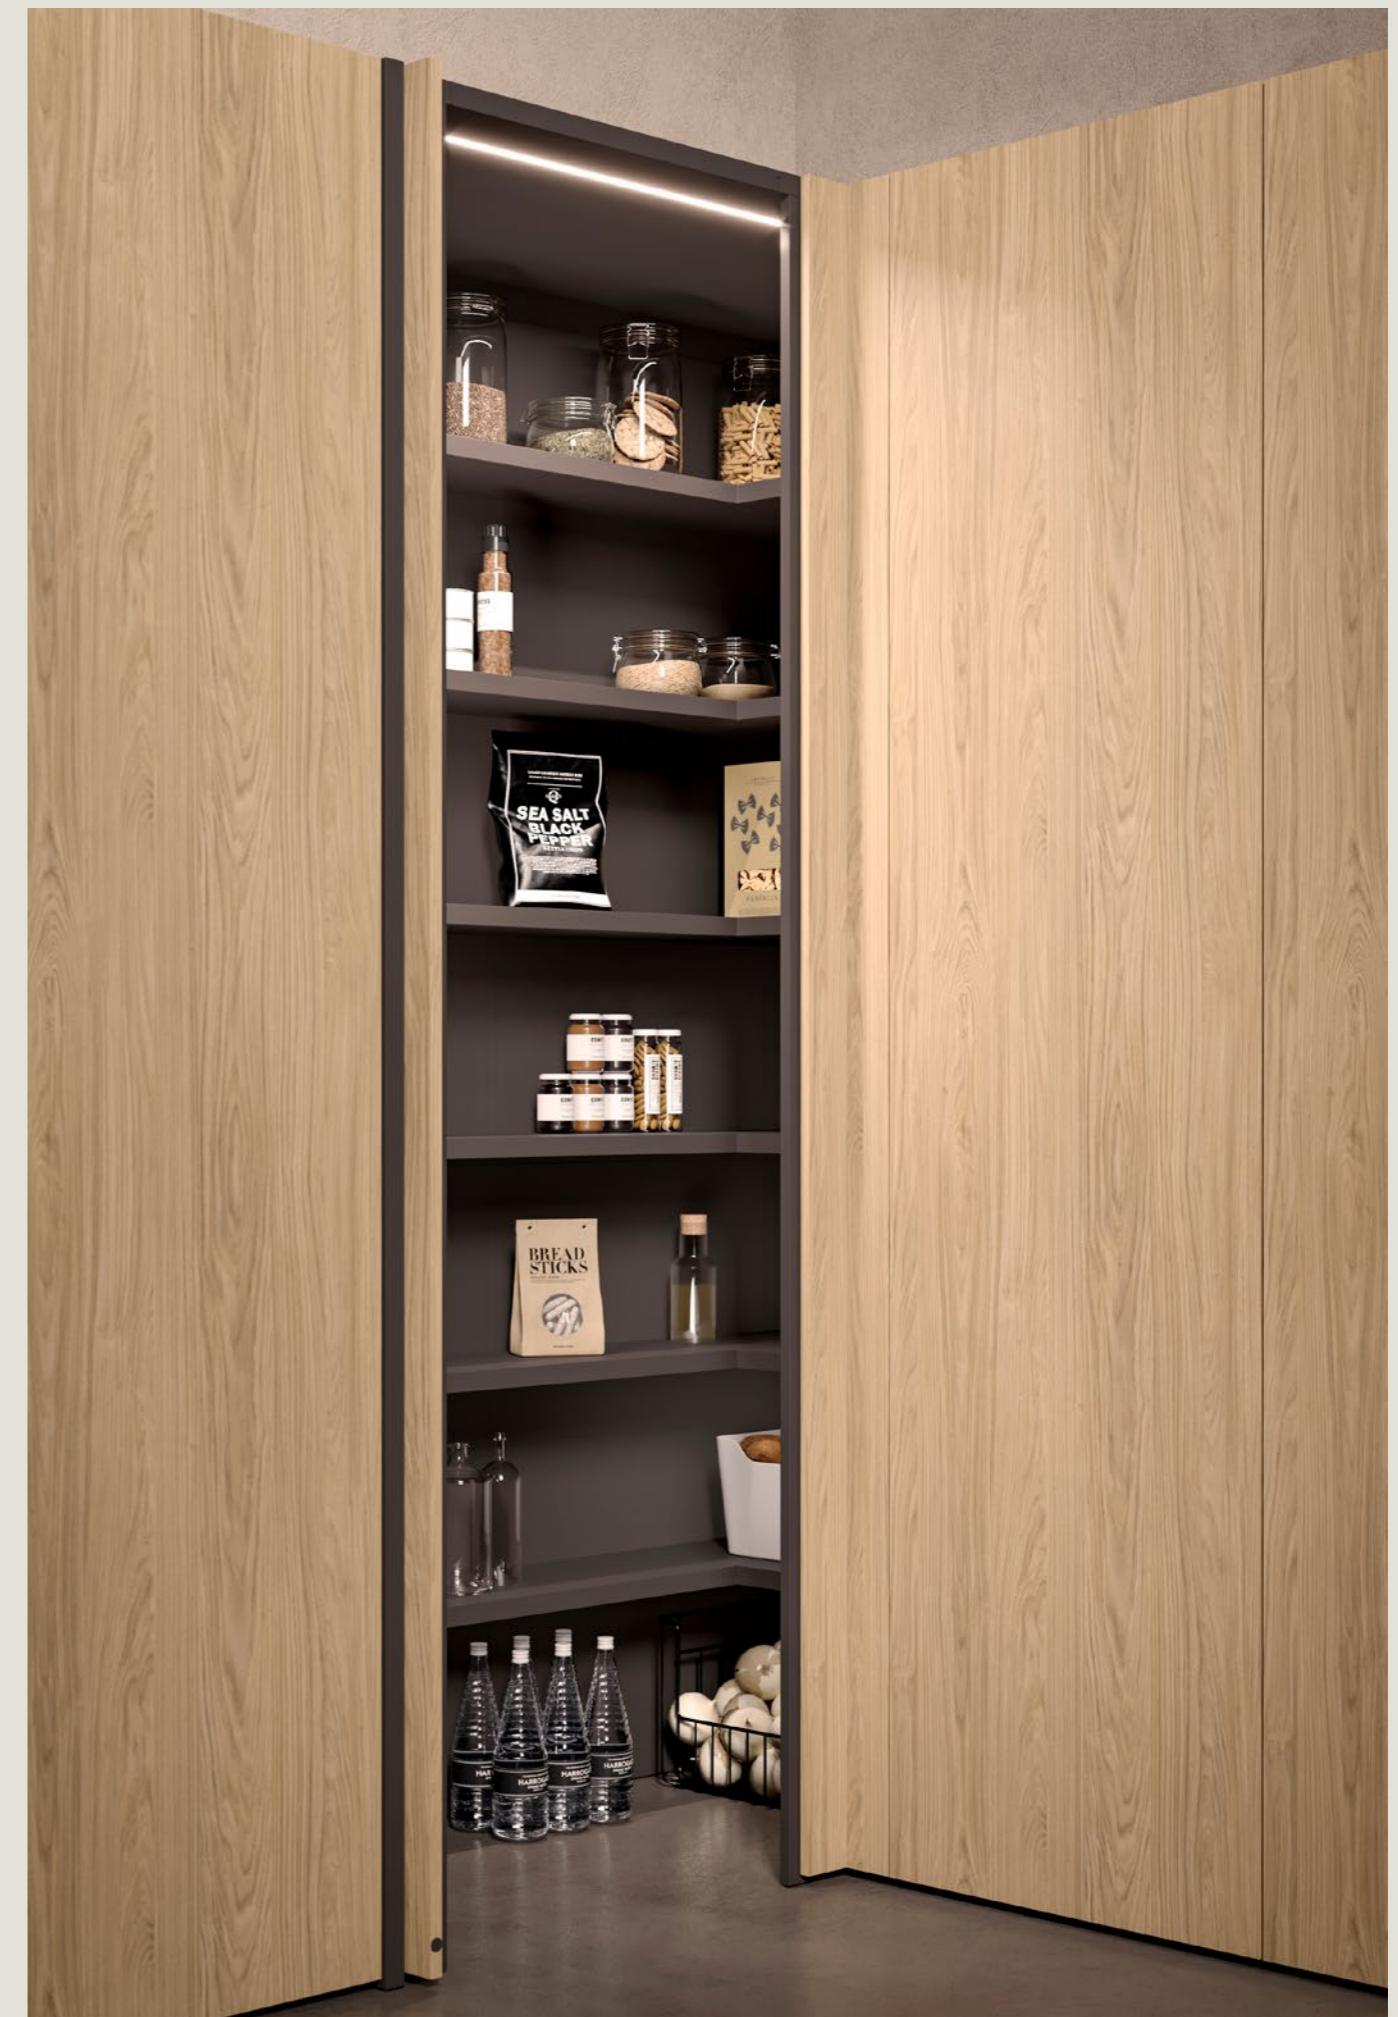

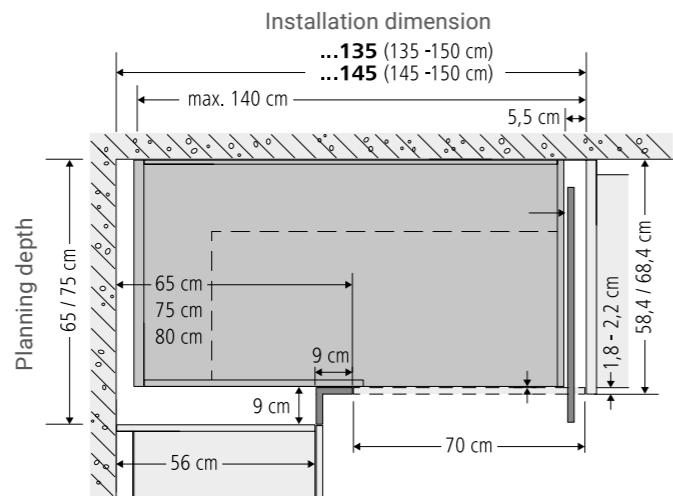

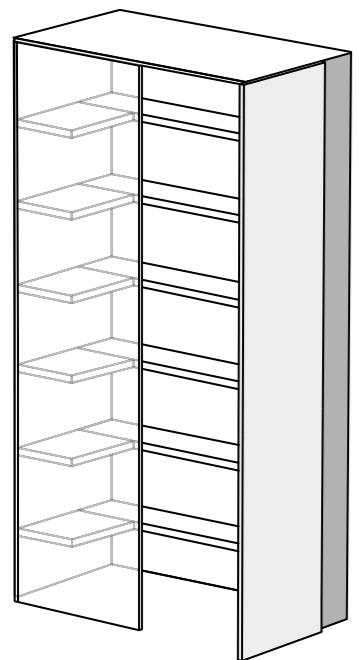

# PANTRY

## WALK-IN CORNER PANTRY UNIT – HFR... CLEVERLY INTEGRATED

The walk-in corner pantry unit combines functionality, organisation and design in a well-thought-out solution – ideal for integrating provisions ergonomically, cleanly and in a space-saving manner directly into the kitchen. As a modern alternative to the classic pantry, it impresses with practical details such as robust shelves in the same colour as the carcase and a space-saving slide-away door – perfect for corner layouts. Optionally available with lighting – for maximum clarity and convenience in everyday kitchen use.

### PRODUCT INFORMATION:

- Accessible without shelf at the bottom
- Front 1.5 cm extended above the floor
- Door width for access 70 cm
- Unit width 130 cm (installation dimension 135 – 150 cm)
- Unit width 140 cm (installation dimension 145 – 150 cm)
- Planning depth (incl. corner blender):  
65 cm (for unit depth 58 cm)  
75 cm (for unit depth 68 cm)
- Lighting possible in the top shelf for optimum visibility
- Stable 28 mm corner shelves in carcase colours connected with fittings

## ROBOT VACUUM CLEANER UNIT

### HIDDEN GARAGE

Hidden storage space for robot vacuum cleaner and charging station T...TSR – invisible and practical. The plinth cut-out with sheet metal tray provides easy access (both in and out) for the robot vacuum cleaner. The charging station is easily accessible at all times for cleaning and servicing.

Suitable for a wide range of standard devices. Please check the required device height and maximum device dimensions including the station in advance.

### PRODUCT INFORMATION:

- **Plinth height:** min. 10 cm
- **Unit width:** 60 cm
- **Unit depth:** 58 cm, 68 cm
- **Minimum front height of the revolving door with wide angle hinges:** 39.5 cm
- Space for robot with station up to 44 x 44 x 47 cm (L x W x H)
- **Entry height for robots:**  
Plinth height – 1.5 cm
- Sturdy powder-coated steel tray in matching carcase colour 273 platinum and 284 carbon grey
- Plinth in unit is closed on the side

### Possible colours:

carbon grey    platinum

# LIFT TRAY FOR UNITS AND SIDE PANELS

## FOR MORE CONVENIENCE IN EVERYDAY LIFE

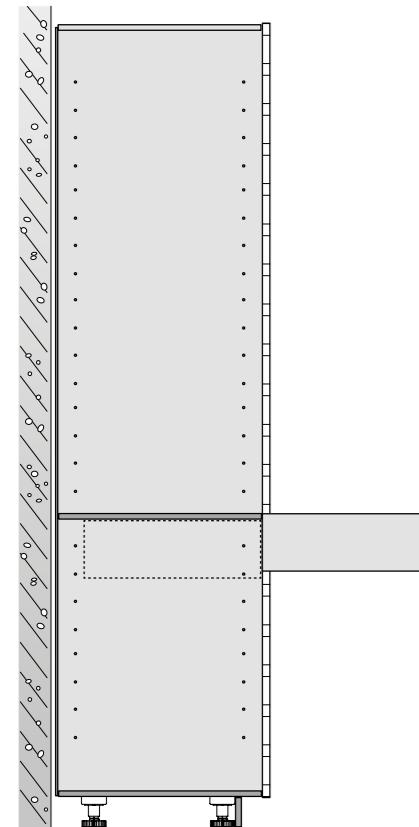

With the new lift trays for tall units and side panels, we are extending our shelf system with an intelligent, versatile tray for more functionality and convenience in everyday life. Whether in a tall unit, breakfast tall unit, slide-away doors tall unit or as an optional extension in the W3 side panel shelf unit – the lift tray creates additional usable space exactly where it is needed. A special highlight is the flush finish of the lift tray with the existing shelf when swung out. This prevents misalignment and allows the extended work surface to be used optimally.

## LIFT TRAY FOR UNITS:

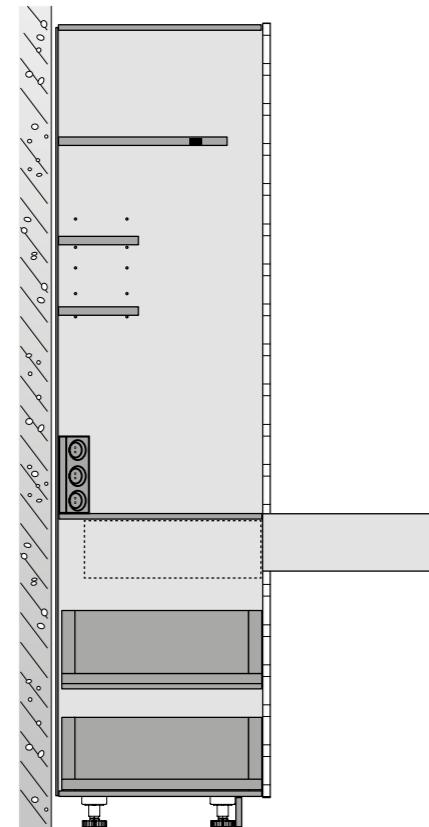

- Widths: 60, 70, 90, 120 cm
- For unit depth: 58 und 68 cm
- Tray pullout depth: 45 cm
- Load: 40 kg
- Version for tall units: 273 platinum and 284 carbon grey
- Design for slide-away doors units: Accessory surround colours
- Position: under a construction shelf
- Adjustable in width

## USE OF LIFT TRAYS:

- Tall units
- Slide-away doors units
- Breakfast tall units
- Side panel shelf units

Lift tray for tall unit  
(HTAL...)

Lift tray instead of pullout tray  
(ANTALVF)

Note: Wide angle hinges necessary  
for units

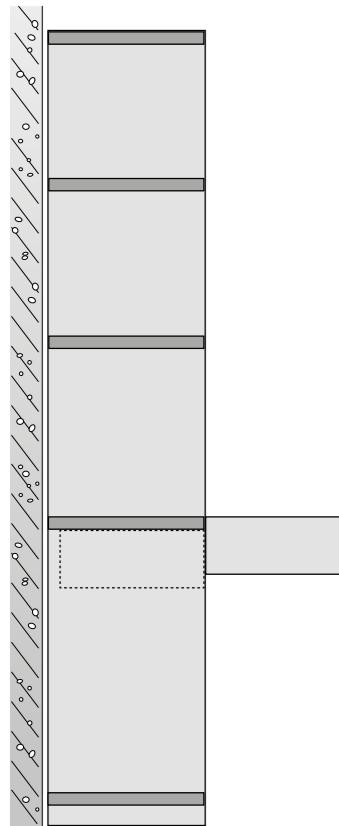

for breakfast tall unit

# LIFT TRAY FOR UNITS AND SIDE PANELS

## FOR MORE CONVENIENCE IN EVERYDAY LIFE

In the W3W side panel shelf unit, the lift tray is a flush extension that can be perfectly integrated into work and living areas as an additional table option – a real plus in terms of flexibility, especially for people who work at home.

## LIFT TRAY FOR SIDE PANEL:

- Widths: from 50 to 120 cm
- Tray pullout depth: 37 cm
- Load: 40 kg
- Finish: Accessory surround colours
- Adjustable in width

## PLANNING TIP:

- The B3W shelf above must be ordered separately
- Possible with a panel depth of at least 44 cm
- Specify position and colour of the lift tray
- A back panel is required

Lift tray for W3 side panel shelf unit –  
(B3WTAL...48)  
flush finish with 2.8 cm shelf

## ALL-ROUND RECESSED HANDLE

## SPECIAL FEATURES / NOTES

### NEW PLANNING FREEDOM

With the introduction of the side panel for the all-round recessed handle, we are expanding our recessed handle range with an exclusive design option for CONTINO floor units. This innovation enables vertical light guidance and gives the kitchen an aesthetically sophisticated, monolithic effect

### CONSTRUCTION:

The side panels are available in all front and accessory surround designs and are equipped with mountings for the surrounding recessed handle; the horizontal recessed handle is mounted on the carcase. To ensure material consistency, the side panels are also available in the worktop material.

- **Variants:** single-sided and double-sided (island planning)
- **Depth:** maximum 120 cm
- With and without lighting

### EXCLUSIONS:

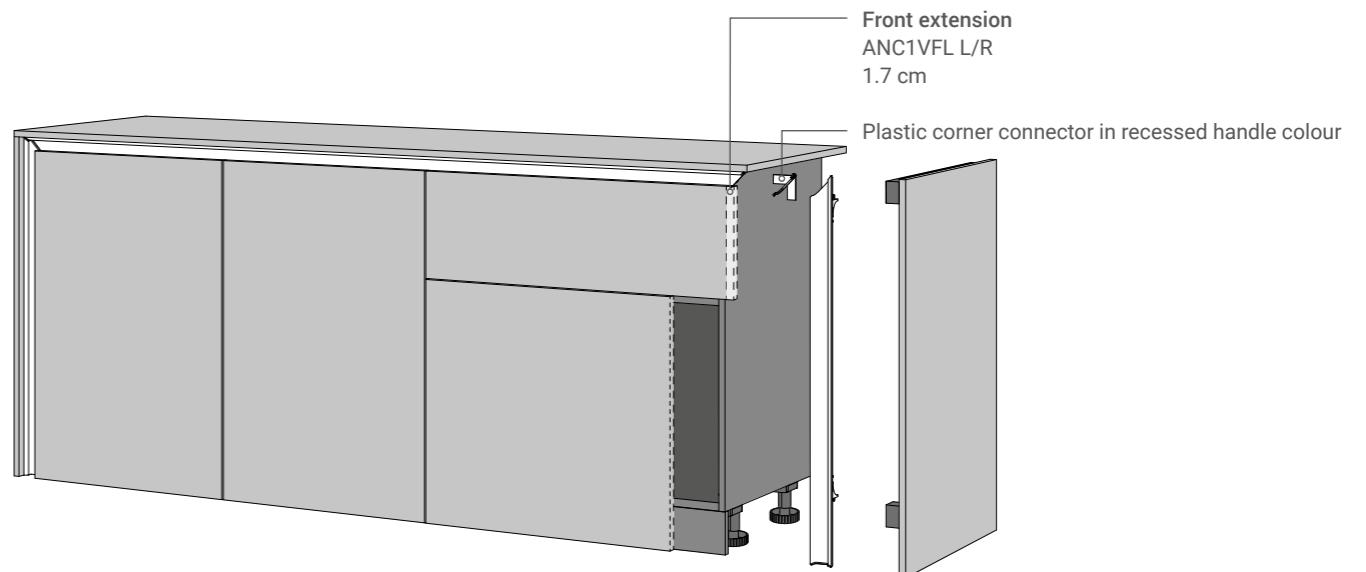

- IOS-C and IOS-C-M

### FRONT PROGRAMME EXCLUSIONS:

- BOSSA/BOSSA-FS (due to 2.5 cm grid increments not suitable for the required 1.7 cm front extension)

### PLANNING TIPS:

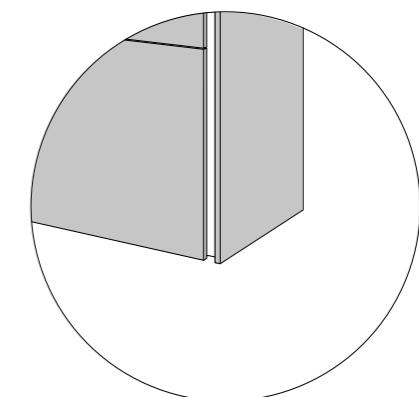

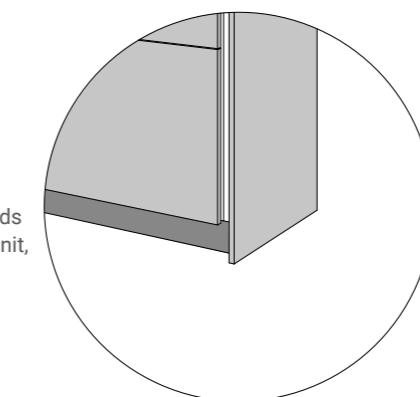

- Hinged revolving doors opposite each other
- Standard recessed handle length: recessed handle ends with lower edge of unit, including end caps
- Recessed handle length with front extension: recessed handle, to the floor, incl. end caps
- Front widening required
- Colour selection is defined via the horizontal recessed handle
- Approved for use in floor unit areas for C1 designs and with continuous front panels
- Not suitable for use in combination with dishwashers, built-under appliances, wine coolers or built-under ovens

### Detailed view:

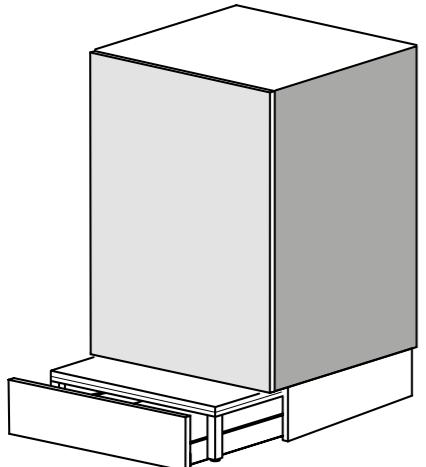

Standard recessed handle length:

Recessed handle ends with lower edge of unit, including end caps

Recessed handle length with front extension:

Recessed handle, to the floor, incl. end caps; plinth flush with carcase

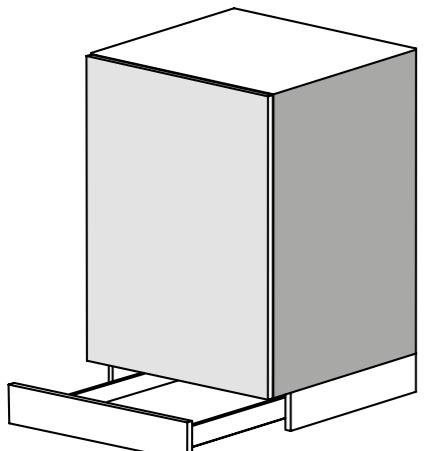

## PULLOUT PLINTH STEP WITH PLINTH DRAWER

Plinth step – a clever solution. In compact kitchens, every centimetre counts: the innovative plinth step transforms the furniture plinth into a practical platform – ideal for children and anyone who wants to reach higher work areas or wall units more easily. Available in **widths from 60 cm to 90 cm** and with an additional plinth drawer for extra storage space. Functional, ergonomic and space-saving.

### PRODUCT INFORMATION:

- Cupboard designed for pullout plinth step with plinth drawer: AN SKST
- Plinth level in 273 platinum and 284 carbon grey
- SKST...58
- SKST...68
- SKST...58 TISO
- SKST...68 TISO
- Step depth: 30 cm
- Handle 564.405 / Tip-Softclose
- Approval: under floor and tall units - plinth drawer 15.0 cm
- Maximum permissible weight: 150 kg

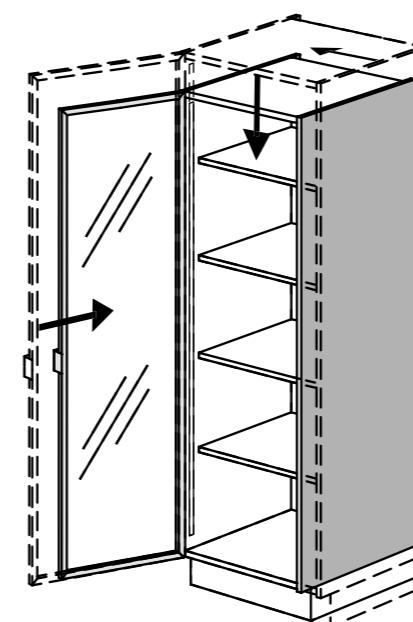

## PRACTICAL PLINTH DRAWER – MORE STORAGE SPACE USED CLEVERLY

More space where you least expect it: the plinth drawer makes optimal use of the space between the plinth legs and creates additional storage space directly in the plinth area. The practical solution is positioned between the plinth legs and blends seamlessly into the plinth cover.

### PRODUCT INFORMATION:

- Cupboard designed for plinth drawer: AN SK
- SK...58
- SK...68
- SK...58 TISO
- SK...68 TISO
- Pullout depth: 40 to 50 cm
- Plinth height: 13.5 to 17.5 cm
- Suitable for unit depths: 58 cm and 68 cm
- Handle 564.405 / Tip-Softclose

### CONVENIENCE MEETS FUNCTIONALITY

Our VERO glass display cabinets, which are compatible with all our programmes, now offer even more design freedom. They are available in customised sizes with widths accurate to the millimetre, ranging from **40-60 cm (single door)** or **80-100 cm (double door)**. Unit heights of 50-250 cm can also be flexibly implemented.

In addition, a **standard height of 93 cm for the floor unit and 119 cm for the tall unit** have been added: our VERO glass display cabinets are therefore available in all standard heights for floor, wall and tall units.

# NICHE SHELF

## FOR MORE VARIETY

The new niche shelving fits seamlessly into the design of the proven DOMO railing and light bridge and can be harmoniously integrated into planning – an elegant and functional solution consisting of shelves, railing and hanging elements for the stylish design of the niche area. With its familiar delicate design language and a profile cross-section of 3.2 x 1 cm, the niche shelving unit impresses with its high-quality, subtle appearance. It is positioned on the worktop in the niche and is available in three standard heights.

## DESIGNS – THREE VARIANTS:

- Niche shelf unit with shelf
- Niche shelf unit with shelf and railing
- Niche shelf unit railing

**Heights:** 54, 68, 68 XL cm

**Widths:** 50, 60, 80, 90, 100, 120 cm

**Depth:** 12 cm

**Colours:** 405 stainless steel, 417 steel black

**Surface:** Anodised aluminium

**Lighting:** optional

## Hanging elements:

wine glass holder, champagne glass holder, paper roll holder, hook bar, tablet holder

## PRODUCT INFORMATION:

- Connection via the niche back panel/panelling
- Removable frosted glass shelves
- Railing and upper shelves optionally illuminated

## PLANNING TIP:

- An extra-deep worktop is required for installation behind a sink or hob; alternatively, a niche shelf unit railing without a shelf can be used
- The niche shelf unit railing can be adjusted in width and thus serves as a width compensator
- Cable outlet at the bottom, allowing for installation without niche cladding
- All shelf elements can be adjusted to the niche height in accordance with the minimum and maximum height

The niche shelving system creates new possibilities for harmoniously combining functionality and design in the kitchen area – aesthetically well-thought-out, technically precise and consistent in its modularity.

# NEW IN THE NICHE

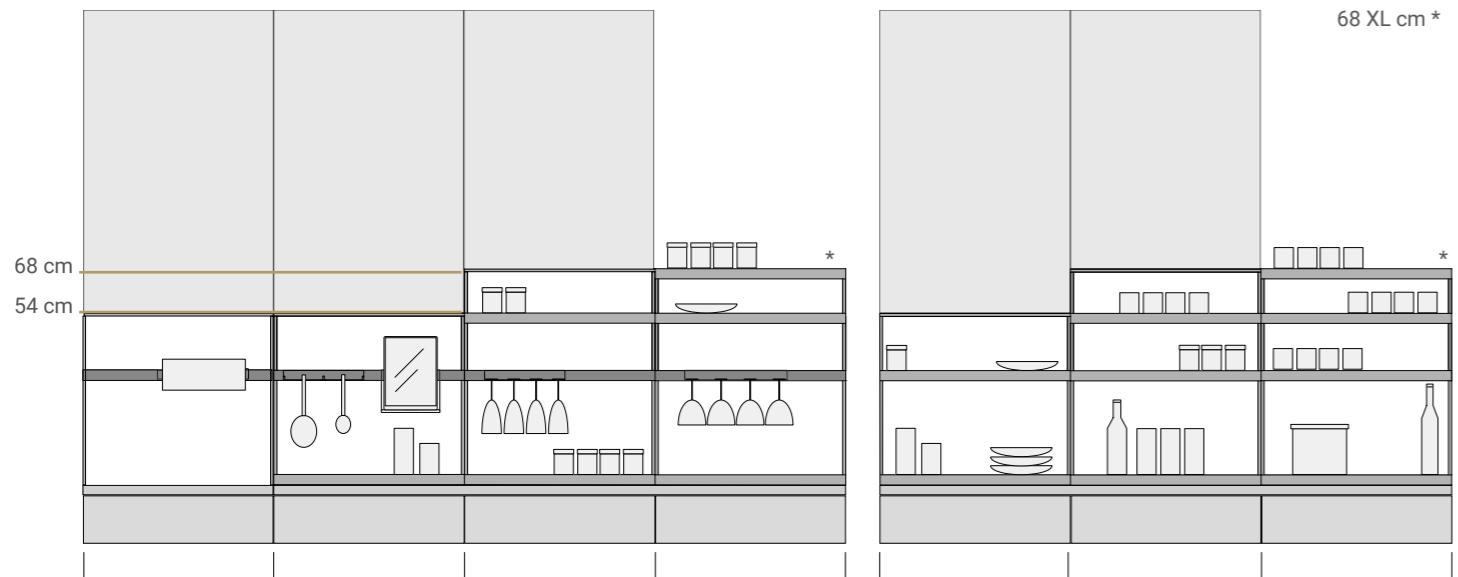

## VARIANT OVERVIEW:

The heights of 54 cm and 68 cm are suitable for niches with wall units or shelf units. They fit perfectly and create a uniform system between the worktop and wall unit/shelf unit.

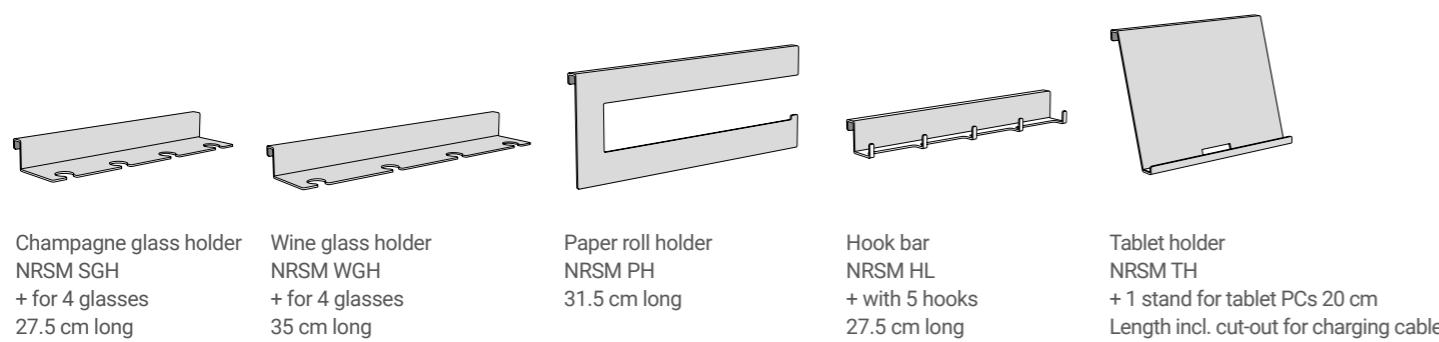

The 68 XL version is designed for possible layouts without wall units or shelving and finishes with an additional shelf that provides further storage space.

## NOTE:

# WORKTOP EXTENSION

K 464 – alba serena

Five new colours are being added to our compact worktop range – from calm and elegant to authentic natural stone looks and modern metal reproductions with character.

K 288 – basaltino  
K 289 – dolomita  
K 464 – alba serena  
K 471 – grigio velluto  
K 472 – acciaio inox

Our decor portfolio of laminate worktops is also being expanded to include the following striking and contemporary colours – naturally including matching worktop edge colours:

K 289 – dolomita  
K 450 – pietra serena  
K 451 – botticino terrazzo  
K 457 – turco argento  
K 462 – nero portoro  
K 464 – alba serena  
K 471 – grigio velluto  
KM 126 – cashmere

These decors impress with their modern material appearance, authentic feel and high durability – perfect for kitchens with architectural appeal.

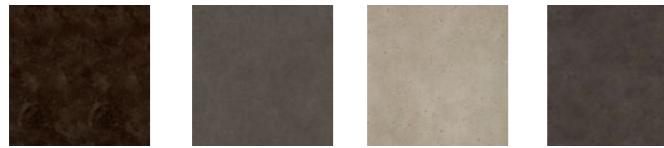

These new decors offer versatile design options ranging from calm and elegant to striking with a natural stone character.

K 472 – acciaio inox
